New Delhi, India | Open to Relocation | Available for Remote Interviews

Summary

Lead Full-Stack & AI Engineer with 8 years of experience owning system design, leading cross-functional squads, and shipping distributed platforms at enterprise scale. Delivered microservices sustaining 10,000+ RPS with 99.9% availability for Emirates NBD and The Walt Disney Company. Deep expertise in Node.js, Python, React, Next.js, Angular, AWS, and production LLM/RAG systems. Recognized for translating complex business requirements into scalable architectures, driving engineering culture, and mentoring teams to deliver high-impact outcomes.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Angular 2+, Redux, React Query, TailwindCSS, SCSS

Backend: Node.js, NestJS, Express, FastAPI, GraphQL, gRPC, REST APIs, Microservices, Event-Driven Architecture, Serverless

AI & LLMs: Agentic AI, LLM Integration (GPT, Claude APIs), RAG Pipelines, LangChain, LangGraph, MCP Frameworks, Prompt Engineering

System Design: Distributed Systems, High-Availability Architecture, CQRS, Saga Patterns, API Gateway Design, Horizontal Scaling

Cloud & DevOps: AWS (Lambda, ECS, API Gateway, SQS/SNS, S3, DynamoDB, Step Functions, CDK), Docker, Kubernetes, Jenkins, GitHub Actions

Data & Messaging: PostgreSQL, MongoDB, DynamoDB, Redis, Elasticsearch, Apache Kafka, RabbitMQ

Observability: Prometheus, Grafana, Datadog, Kibana, Sentry

Testing: Jest, Cypress, Playwright, Mocha/Chai, Integration and E2E Testing

Auth & Security: OAuth2, JWT, OpenID Connect, Auth0, SSO, RBAC

Professional Experience

Lead Software Engineer – *Virtusa Middle East*

Nov 2024 – Present

Clients: Emirates NBD, The Walt Disney Company | Dubai, UAE

- Owned end-to-end system design for NestJS microservices with PostgreSQL and Redis, sustaining **10,000+ RPS** at **99.9% uptime** across multi-region banking deployments.
- Planned and documented architecture RFCs for Kafka-based event pipelines processing **millions of events/month** with idempotent consumers, dead-letter queues, and exactly-once delivery semantics.
- Engineered LLM-powered agentic automation (MCP + RAG) with vector-based semantic search, eliminating **35%** of repetitive tasks and achieving **>90%** context relevance on internal queries.
- Directed a cross-functional squad of 8 engineers, driving sprint planning, backlog prioritization, and stakeholder alignment across product, QA, and infrastructure teams.
- Streamlined CI/CD pipelines using Jenkins and GitHub Actions, cutting deployment cycles from **60 min to 14 min** and enabling 3x faster feature releases.
- Mentored 4 engineers through design reviews and pair programming, contributing to 2 promotions within 6 months.

Full-Stack Developer / Team Lead – *Ernst & Young (EY)*

Sep 2023 – Oct 2024

Client: Tata AIG Insurance | Gurugram, India

- Led a 6-member squad delivering Node.js and React insurance platforms, reducing claim cycle time from 3 days to under 2 days (**20% faster**).
- Developed serverless event-driven pipelines with AWS Lambda, SQS, and Step Functions, scaling throughput while lowering infrastructure spend by **15%**.
- Optimized Angular frontend performance via lazy loading and bundle splitting, cutting page load time by **35%**.
- Established automated testing strategy, raising coverage from 50% to **75%** with Jest and Cypress, reducing production defects by **30%**.

Full-Stack Developer – *NeoSoft Technologies*

Oct 2021 – Aug 2023

Clients: Deloitte, Viacom18, Network18 | Noida, India

- Spearheaded migration from monolith to modular microservices, defining service boundaries and communication patterns for **5,000+ concurrent users**.
- Created GraphQL schema and migration path from legacy REST APIs, reducing over-fetching by **40%**.
- Tuned PostgreSQL and MongoDB query plans with indexing strategies, cutting p95 latency by **300–500 ms**.
- Deployed centralized logging and alerting with Kibana, reducing MTTR from 2 hours to **30 minutes**.

MEAN Stack Developer – AdGlobal360Mar 2021 – Nov 2021

Gurugram, India

- Delivered a real-estate lead management system tracking **2,000+ monthly leads**, lifting sales closure rate by **15%**.
- Introduced Redis caching and query optimization, dropping API response time from 1.2s to **380 ms**.

Full-Stack Developer (Independent) – FreelanceJun 2018 – Feb 2021

Remote

- Shipped **8+ production platforms** for startups and SMEs, owning the full lifecycle from requirements through deployment.
- Implemented secure REST APIs with JWT, OAuth2, and RBAC supporting **5,000+ active users**.

Key Project

AI Workflow Automation Platform – LLM, MCP, RAG, LangChain, Python, FastAPI2024

- Defined the architecture for an agentic orchestration platform integrating LLM APIs with task pipelines, enabling automated decision workflows across engineering and support operations.
- Incorporated retrieval-augmented generation over internal knowledge bases using Python and FastAPI, delivering context-aware responses with **>90%** relevance accuracy and reducing manual effort by **35%**.

Open Source

local-load-balancer | npmjs.com/package/local-load-balancer

Node.js load-balancing package implementing round-robin and weighted distribution with real-time metrics logging for distributed development environments.

Education

PG Program, Computer Software Engineering – Great Lakes Institute of Management, Gurugram2023

B.Tech, Computer Science Engineering – Dr. A.P.J. Abdul Kalam Technical University2014 – 2018

Awards and Certifications

- **GEM Award, Emirates NBD (2024):** Recognized for driving high-throughput backend architecture and developer experience improvements across critical banking systems.
- **EY Cloud Bronze Certification (2024):** Validated expertise in cloud-native architecture using AWS Lambda, ECS, API Gateway, and DynamoDB.
